

MaxColor™ 4K60 Transmitter

MC-TX1

Just Add
Power

The MaxColor™ 4K60 Transmitter natively supports 4K60 input, allowing you to distribute 4K UHD video from the growing number of 4K sources with no downscaling or subsampling. With MaxColor, 4K60/4:4:4/36-bit video can be distributed over a 1Gb managed network using existing Cat 5e/Cat 6 cable, eliminating the expense of upgrading to fiber and buying costly network switches.

Use MaxColor 4K60 Transmitters and Receivers to create your new system, or bridge them to a system with 3G Ultra models to support a variety of source and screen formats.

Features

Audio	Supports all lossless audio formats	Image Pull	Preview an image from any source or display, in any web browser or control system, at up to 30 fps
Color Depth	Supports deep color up to 36-bit	Scalability	Can run parallel and or be bridged with all 3G Ultra models <i>Bridging requires additional hardware</i>
HDR Support	HDR10, HDR10+, HLG, Dolby Vision, and SDR	Supported Resolution	Computer and video resolution 4K60 @ 4:4:4
Integrated Endpoint Control	Control endpoints with CEC, IR, RS232
